

PESADONA (SERIES E)

Colored PVC

KALLOS PESADONA (KDSE) is a PVC profile offering a generous visible strip reveal of PVC enhancing the installation. These profiles offer superb resistance to principal chemical and atmospheric agents and are particularly recommended to be used as divider in between different type of finishes in zones such as food processing industries, breweries, dairies, hospitals and external applications and wet area. Its smooth and non-porous surface makes it especially difficult for the adhesion and survival of bacteria and/or other microorganisms.
